

# 2016 NCTU\_Formosa iGEM team

## § Introduction

Spiders have evolved genuinely sophisticated predatory skills whereas NCTU\_Formosa has created a brand new system that will revolutionize conventional agriculture. It is high time for upgrading the working styles of farming with the combination of synthetic Biology, Informatics and Engineering corresponding to Pantide, device and Internet of things in our project.

- Eco-friendly
- Specific
- Bio-degradable

- Artificial Intelligent
- Internet of Things
- Customized
- Prediction & Decision

- Best Presentation
- Best Applied design
- Best Part Collection
